The **Oncology Patient-Centered Medical Home™ (OPCMH™)** is an oncology practice model which transforms care management processes and accountabilities to deliver value-based cancer care. In addition to improved care continuity and patient satisfaction, OPMCH brings about marked reductions in the overall cost of cancer care.

The Oncology Patient-Centered Medical Home has become a prevalent and timely concept that represents the preferred practice model in our new era of healthcare reform. In addition to interest in the model’s cost savings potential from Medicare and commercial health insurers, hospitals and health systems have become active in this dialogue as representing a new oncologist-hospital alignment strategy as well as a platform for developing alternate payment/reimbursement methodologies in the context of accountable care (ACO). Practices adopting the OPCMH model can expect to realize operational efficiencies and practice overhead savings exceeding their cost of transformation.

The Oncology Patient-Centered Medical Home was pioneered by John D. Sprandio, M.D., Consultants in Medical Oncology & Hematology (CMOH), Drexel Hill, Pennsylvania. In April 2010, CMOH became the original oncology practice to be awarded Level 3 Recognition under the Patient-Centered Medical Home Program of the National Committee on Quality Assurance (NCQA), a professional distinction which CMOH enjoys today.

**Oncology Management Services, Inc.**

Oncology Management Services, Inc. (OMS) was founded by Dr. Sprandio in response to the overwhelming demand for guidance from those in the community oncology sector wishing to adopt the Oncology Patient-Centered Medical Home model in their own settings.
EDUCATIONAL SERIES
- Introductory session via monthly group webinar at no charge to participants;
- Advanced customized sessions via webinar; or
- Advanced customized session via in-person meeting on-site in Philadelphia or on-site at provider’s location.

READINESS ASSESSMENT
- Gauges practice readiness to move from current status to OPCMH model.
- Provides GAP analysis and recommendations to achieve equivalent of Level 3 NCQA Recognition.
- Includes Technology Assessment for OPCMH standards and practice efficiencies.

IMPLEMENTATION
- Based on findings of OPCMH Readiness Assessment, OMS practice transformation specialists guide process and organizational re-engineering.
- Training and retraining staff.
- Health plan payment methodology development and re-contracting.

SOLUTIONS AND TOOLS
- A menu of OPCMH-specific tools and solutions is available to providers on a “private label” basis.

TECHNOLOGY AND DECISION SUPPORT
- OPCMH-EMR Decision-Support Usability Assessment.
- Enhancements / Refinements to existing EMR to maximize practice efficiency, clinical decision support and OPCMH implementation.
- OPCMH-enabling software upgrade if indicated (IRIS Software license).
- Patient Portal.
- Referring Physician Portal.
